

HIMA TEJA VANKAYALAPATI

+91 6302562033 | himatejahima032@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Aspiring Full Stack Developer specializing in Django, Django REST Framework (DRF), and React.js, with hands-on experience building scalable ERP and booking systems. Proficient in designing secure RESTful APIs, implementing JWT-based authentication, and developing role-based applications. Strong focus on backend architecture, performance optimization, and delivering production-ready, scalable solutions using MySQL.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript.
- **Frontend Development:** HTML5, CSS3, React.js (Component-Based Architecture).
- **Backend Development:** Django, Django REST Framework (DRF), REST API Development.
- **Database Management:** MySQL (Schema Design, Query Optimization).
- **Authentication & Security:** JWT Authentication, Token-Based Authentication, RBAC.
- **Tools & Technologies:** Git, GitHub, Postman, VS Code, Copilot, Cursor, Netlify, Render.
- **Professional Skills:** Full Stack Development, Scalable Systems, Backend Architecture, Agile Methodology, SDLC, Problem Solving, Analytical Thinking, Team Collaboration.

PROJECTS

Bus Ticket Booking System - Full Stack Application

[GitHub - Frontend](#) [GitHub - Backend](#)

Tech Stack: React.js, Django REST Framework, MySQL, Token Authentication

- Developed a scalable booking system with secure authentication and role-based access control (RBAC).
- Designed REST APIs integrated with MySQL for booking, reservation workflows, and user management.
- Implemented seat allocation logic and transaction handling, ensuring end-to-end booking accuracy.
- Built robust CRUD operations with data validation and error handling in MySQL-backed systems.
- Integrated frontend and backend using structured JSON APIs for efficient and reliable communication.
- Improved application reliability through modular backend architecture and optimized MySQL queries.

FactoryIQ - Manufacturing ERP System

[GitHub - FactoryIQ](#)

Tech Stack: React.js, Django REST Framework, MySQL, JWT Authentication

- Developed a full-stack ERP system supporting 4+ user roles (Admin, Engineer, Quality, Customer) using RBAC.
- Implemented JWT-based authentication, enhancing API security and access control across all modules.
- Designed and optimized RESTful APIs integrated with MySQL, improving system performance and data handling efficiency.
- Built modules for production tracking, inventory management, and quality assurance workflows.
- Developed real-time dashboards to monitor KPIs such as production output and defect tracking.
- Integrated email notifications and document workflows, improving automation and user experience.

INTERNSHIP / TRAINING

Embedded Systems Virtual Internship

Jan 2025 - Mar 2025

EduSkills

- Applied Python programming concepts to solve real-world technical problems in embedded environments.
- Performed debugging, optimization, and error analysis to improve overall code performance.
- Gained exposure to Software Development Life Cycle (SDLC) and Agile methodologies in a team setting.

EDUCATION

Bachelor of Technology (B.Tech) - Electronics and Communication Engineering

2022 - 2025

Sree Rama Engineering College, Tirupati | JNTU Anantapur

CGPA: 7.20 / 10 (71.96%)

ACHIEVEMENTS

- Developed and completed 2+ full-stack web applications using Django, React.js, and MySQL.
- Demonstrated strong understanding of REST API development, JWT security, and MySQL database design.
- Practiced and improved problem-solving skills using Python and MySQL queries consistently.

CERTIFICATIONS

- Python Full Stack Development - Vcube Software Solutions.
- Python & MySQL Training - Besant Technologies.
- Python Programming Certification - Infosys Springboard.
- MySQL (Database Management) Certification - Infosys Springboard.
